

# BioClean-D™ Sterile Disposable Coverall with Hood & Integrated Boots DONNING PROCEDURE

**1** Don first pair of BioClean™ sterile gloves, facemask and bouffant cap.

**2** Open vacuum-packed bag using EasyTear™ edge. Remove inner pack and open using EasyTear™ edge.

**3** Remove coverall from inner pack, gently unfold and unzip ensuring it does not touch the floor. Holding the coverall inside at the waist.

**4** Put one foot into leg opening, pull coverall up over leg until foot reaches bottom of boot. Do the same with the other foot.

**5** Insert one hand through wrist opening, bringing coverall up over arm. Do the same with the other arm. Put thumbs through the thumb loops.

**6** Bring hood over head touching only the inside.

**7** Tie boot ties to ensure a tight fit at ankle.

STEP

STEP

**8** Cross legs, straighten back and zip up coverall.

**9** Remove backing tape on zip flap and press down lightly. Sanitize gloves.

**10** If required don BioClean sleeve covers using aseptic technique. Please refer to BioClean-D™ Sterile Sleeve Covers donning procedure.

**11** Don BioClean goggles.

**12** Sanitize gloves. Don second pair of sterile gloves, using aseptic donning technique.

**13** Perform a final inspection prior to entry into the sterile cleanroom, ensuring no skin is visible and all apparel is donned correctly.
