

# INFO GUIDE TO BICP AUTOCLAVING

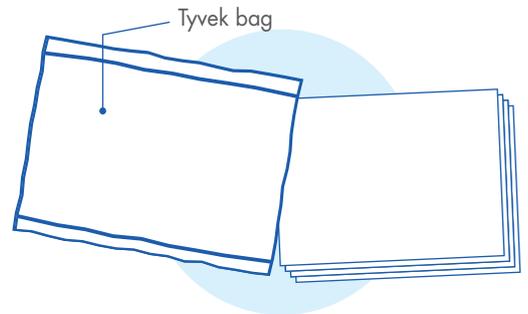

1

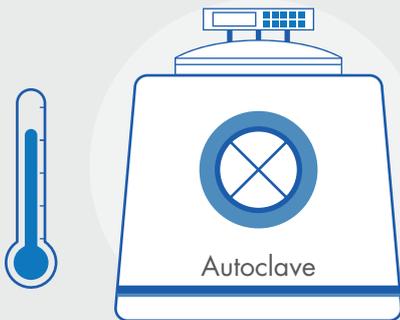

The BICP Cleanroom paper (plain or with printed letterhead) can be placed inside a Tyvek bag.

2

You can sterilise as many sheets as you can fit into the bag at any one time. No need to only autoclave sterilise one sheet at a time.

3

The bag is Autoclaved at 121 °C for 30 minutes (1 cycle)

4

The bag is dried at 50 °C for 60 minutes
