

# FOOD

| Product name      | Qualities                                                              | Further details        |
|-------------------|------------------------------------------------------------------------|------------------------|
| NutriCal CC 300   | Calcium carbonate, light, prec., Ph.Eur., E170, food grade             | BD approx. 300 g/l     |
| NutriCal CC 450   | Calcium carbonate, light, Ph.Eur., USP, E170, food grade               | BD approx. 450 g/l     |
| NutriCal CC 600   | Calcium carbonate, E170, food grade                                    | BD approx. 550-600 g/l |
| NutriCal CC 800   | Calcium carbonate, heavy, Ph.Eur., USP, E170, food grade               | BD approx. 750-800 g/l |
| NutriCal CC 1120  | Calcium carbonate, heavy, E170, food grade                             | BD approx. 1120 g/l    |
| NutriCal CC 90 DC | Calcium carbonate, heavy, granulated, Ph.Eur., USP, E170, food grade   | for direct compression |
| NutriCal AC       | Calcium acetate                                                        | different qualities    |
| NutriCal CH 54    | Calcium hydroxide, E526, food grade, purity acc. to Ph.Eur., USP, FCC  |                        |
| NutriCal CI       | Tri-Calcium citrate-4-hydrate, USP, FCC, E333(ii), food grade          |                        |
| NutriCal CL 2     | Calcium chloride-2-hydrate, cryst., Ph.Eur., USP, JP, E509, food grade |                        |
| NutriCal CL 6     | Calcium chloride-6-hydrate, cryst., Ph.Eur., E509, food grade          |                        |
| NutriCal CL an    | Calcium chloride anhydrous, powder, E509, food grade                   |                        |
| NutriCal CO       | Calcium oxide, FCC, E529, food grade                                   |                        |
| NutriCal DCP      | Di-Calcium phosphate, Ph.Eur., USP, E341(ii), food grade               |                        |
| NutriCal DCP an   | Di-Calcium phosphate anhydrous, Ph.Eur., USP, E341(ii), food grade     |                        |
| NutriCal GHO      | Calcium glucoheptonate                                                 |                        |

|                 |                                                                      |                        |
|-----------------|----------------------------------------------------------------------|------------------------|
| NutriCal GO     | Calcium gluconate                                                    | different qualities    |
| NutriCal GLOCAL | Calcium gluconate lactate                                            |                        |
| NutriCal GY     | Calcium glycerophosphate, BPC or Ph.Eur.                             |                        |
| NutriCal LA     | Calcium lactate-5-hydrate, USP, E327, food grade                     |                        |
| NutriCal PER    | Calcium peroxide, min. 75% FCC                                       |                        |
| NutriCal ST-v   | Calcium stearate, USP/ NF, Ph.Eur., E470a, food grade                | vegetable origin       |
| NutriCal SU     | Calcium sulfate-2-hydrate, E516, food grade                          |                        |
| NutriCal TCP    | tri-Calcium phosphate anhydrous, Ph.Eur./ USP, E341(ii)              |                        |
| NutriFer CI     | Ferrous citrate                                                      |                        |
| NutriFer FU     | Ferrous fumarate, Ph.Eur., USP, FCC                                  |                        |
| NutriFer FU DC  | Ferrous fumarate 90%, gran.                                          | for direct compression |
| NutriFer GY     | Ferric glycerophosphate, BPC or NF                                   |                        |
| NutriFer P      | Iron powder , FCC                                                    |                        |
| NutriFer GO     | Ferrous gluconate, BP or USP or Ph.Eur.                              |                        |
| NutriFer OP     | Ferric orthophosphate FCC                                            |                        |
| NutriFer PY     | Ferric pyrophosphate FCC                                             |                        |
| NutriFer SU     | Ferrous sulfate, BP or USP or Ph.Eur.                                | dried or heptahydrate  |
| NutriFer SUC    | Ferrous sucrose USP                                                  |                        |
| NutriMag MC 80  | Magnesium carbonate, extra light Ph.Eur,E504(ii), food grade         | BD approx. 80 g/ l     |
| NutriMag MC 120 | Magnesium carbonate, light, Ph.Eur.                                  | BD approx. 120 g/ l    |
| NutriMag MC 400 | Magnesium carbonate, heavy, Ph.Eur., E504(ii), food grade            | BD approx. 400 g/ l    |
| NutriMag MC 500 | Magnesium carbonate, heavy, Ph.Eur.                                  | BD approx. 500 g/ l    |
| NutriMag MC 600 | Magnesium carbonate, heavy, Ph.Eur., USP, FCC, E504 (ii), food grade | BD approx. 600 g/ l    |

|                    |                                                                    |                          |
|--------------------|--------------------------------------------------------------------|--------------------------|
| NutriMag MC 450 DC | Magnesium carbonate, heavy, granulated                             | for direct compression   |
| NutriMag MH 500    | Magnesium hydroxide, powder, Ph.Eur, E528, food grade              | BD approx. 500 g/l       |
| NutriMag MH 350    | Magnesium hydroxide, powder Ph.Eur., USP, FCC, E528, food grade    | BD approx. 350 g/l       |
| NutriMag MH food   | Magnesium hydroxide, E528, food grade                              |                          |
| NutriMag MO 145    | Magnesium oxide, extra light, purity acc. Ph.Eur.                  | BD approx. 145 g/l       |
| NutriMag MO 500-E  | Magnesium oxide, heavy, Ph.Eur., USP, FCC, E530, food grade        | BD approx. 500 g/l       |
| NutriMag MO 600    | Magnesium oxide, heavy, E530, food grade                           | BD approx. 500 g/l       |
| NutriMag MO 900 DC | Magnesium oxide, heavy, granulated, Ph.Eur., USP, E530, food grade | for direct compression   |
| NutriMag AC        | Magnesium acetate, chem. pure or BP                                |                          |
| NutriMag AS        | L-Magnesium aspartate-2-hydrate, Ph.Eur.                           |                          |
| NutriMag CI        | Magnesium citrate (hydrous), DAC                                   |                          |
| NutriMag CIG       | Magnesium citrate (hydrous), DAC                                   |                          |
| NutriMag CI an     | Tri-Magnesium dicitrate anhydrous, USP                             |                          |
| NutriMag CIC an    | Tri-Magnesium dicitrate anhydrous, Ph.Eur., USP                    |                          |
| NutriMag CL 6 F    | Magnesium chloride-6-hydrate, powder, E511, food grade             |                          |
| NutriMag DOL       | Magnesium Calcium carbonate (Dolomite)                             | different particle sizes |
| NutriMag GH        | Magnesium glucoheptonate                                           |                          |
| NutriMag GO        | Magnesium gluconate, USP                                           |                          |
| NutriMag GY        | Magnesium glycerophosphate, BPC                                    |                          |
| NutriMag LA        | Magnesium lactate-2-hydrate                                        |                          |
| NutriMag PER       | Magnesium peroxide, min. 25 %, Ph.Eur.                             |                          |
| NutriMag PP        | Magnesium phosphate                                                | different qualities      |

|                    |                                                          |                            |
|--------------------|----------------------------------------------------------|----------------------------|
| NutriMag SI        | Magnesium silicate                                       | different qualities        |
| NutriMag ST-v      | Magnesium stearate, USP/ NF, Ph.Eur., E470b, food grade  | vegeable origin            |
| NutriMag SU 7      | Magnesium sulfate-7-hydrate, cryst., BP/ USP/ Ph.Eur.    |                            |
| NutriMag SU dr     | Magnesium sulfate, dried, powder                         | different qualities        |
| NutriMag TRI       | Magnesium trisilicate, BP/ USP/ Ph.Eur.                  | light and heavy            |
| Kaolin             |                                                          |                            |
| MCC                | Microcristalline Cellulose, EP, E460(i)                  |                            |
| Sodium selenite    | Sodium selenite approx. 1 % on Calcium carbonate         |                            |
| Sodium stearate    | Sodium stearate                                          | different qualities        |
| Sodium bicarbonat  | Sodium bicarbonate, Ph.Eur., E500(ii)                    | Sodium hydrogene carbonate |
| Potassium carbonat | Potassium carbonate, E501(i)                             |                            |
| Potassium citrate  | Tri-Potassium citrate-1-hydrate, Ph.Eur., USP, FCC, E332 |                            |
| Potassium chlorid  | Potassium chloride, USP or FCC or E508                   |                            |
| Potassium sulphate | Potassium sulphate, EP, FCC, E515                        |                            |
| NutriZinc CI       | Zinc citrate-trihydrate                                  |                            |
| NutriZinc BIS      | Zinc bisglycinate                                        |                            |
